01 ABOUT GOLDENMENA

GoldenMena is a Riyadh-based company dedicated to the art and technology of architectural scale models. From commercial towers and city master plans to immersive exhibition environments, we deliver museum-grade models that bring architecture to life, uniting world architectural aesthetics with technology-driven craftsmanship.

Working from consulting to execution, GoldenMena manages every stage of a commission: concept, engineering, fabrication, lighting, logistics and installation. Each piece is built with millimetre-level precision and finished to the standard demanded by leading developers, government entities and design institutions across the Kingdom of Saudi Arabia and the wider region.

Smart technology is woven into our model making: integrated lighting scenes, motion and interactive media that turn a static model into an unprecedented visual and emotional experience for its audience.

01 MISSION

Heritage of craftsmanship, embodiment of refined perfection.

02 VISION

Crafting an industry-leading brand, delivering exemplary models.

03 VALUES
